OUR COST PROPOSAL

Execution Strategy

The execution strategy incorporates proven methodologies, seasoned qualified instructor personnel, and a highly responsive approach to managing deliverables. Following is a description of our project methods, including how the project will be developed, a proposed timeline of events and reasons for why we suggest developing the project as described.

Technical/Project Approach

Platform ERP Training UK System – These servers are located in US and UK covering users in global locations. There is no infrastructure overhead or assets expenditure to users or school. A PC/Laptop with Windows or Mac system and internet connection is required.

Users / Students will be given a user name and password, to log on the pc and use their credentials to log on to live system 24/7.

The following is received from the provider

We can provide shared server access with no Data Guarantee or Data backup. Any global user can access the server that may cause slower data transfer / service.

Project Deliverables

Each batch/course duration will be 2 months, then 1-month individual practice time for a total duration of 3 months. Separate remote individual service access is available. Contact us for access cost details.
